

Private Money Lending Solutions

KJC Prime Capital Group provides fast, flexible private money lending for real estate investors, builders, and entrepreneurs who need capital aligned with opportunity rather than bank timelines. Our lending approach helps you move decisively, close confidently, and grow strategically.

Why Private Money Lending?

Private lending is designed for time-sensitive transactions and non-traditional borrowers. Our focus is on the value, potential, and execution of the deal itself, giving you a competitive advantage in fast-moving markets.

Speed That Wins Deals

Approvals and funding in days, not months. Streamlined documentation and underwriting reduce friction and allow for quick closings in competitive environments.

Flexible Qualification Standards

Asset-based lending centered on property value and upside potential. Ideal for self-employed borrowers, seasoned investors, and credit-challenged buyers without rigid income verification requirements.

Customized Loan Structures

Loan terms are tailored for fix-and-flip projects, rental properties, new construction, and commercial investments. Creative structures are available where traditional banks fall short.

Stronger Leverage for Investors

Move quickly on opportunities before competitors act. Scale your portfolio with dependable access to capital and finance projects that conventional lenders frequently decline.
